Diveev Daniil

Motivated data scientist willing to help business with data driven cases using DS, DL and statistics

Hard Skills

Beginner: Kubernetes, Docker, Django, Java, Hadoop, pySpark

Intermediate: machine/deep learning models building and deployment, basic computer science, PyTorch DL framework, algorithms problem solving, statistics, AB-testing, PostgreSQL

Advanced: DS python libraries (data visulization, tables processing, numpy etc.), basic Python

Education

2019-2022	Academic gymnasium at SPBU, Apllied mathematical and information technologies
2019-2020	Digital Banana, Data Analysis and Machine Learning
2022	MTS Teta, data analysis school
since 2022	ITMO University, Neurotechnologies and programming

Work experience

june - august 2021	Data engineer at Picklang. Created educational polls
january - march 2022	Data engineer at ITMO Learning Analytics. Marked up educational plans
since december 2022	Data analyst at ITMO Learning Analytics. EDA, data collection and manipulation

Pet projects and hackathons

Won "Neuroneft" hackathon conducted by Tyumen Oil and Gas Forum (timeseries forecasting using catboost ensemble trained on autoregression features)

Solved BCG Gamma hackathon case (number of vistits to Inivitro clinics related to ticks predcition) using ARIMA regression models ensemble

Won Artificial Intelligence International Junior Contest 2021 (multihop question answering using transformers)

Finetuned RU-GPT-3

Realized a project by ITMO ML lab for Evening Urgant team (question generation using qg-gpt)

Built a specialized bot for entrepreneurs that answers any juridical questions (feature extraction and QA transfomers)

Built a bot that searches online shops for given product (telegram-bot-API, selenium, SQLAlchemy)

Solved ML, DL freelance cases (recommendation systems, CV, NLP, statistical analysis)
